

Möbius Fruity

an object in the key of fruit
promises a certain feeling:
part open the object curtain
and see a thing type control
by fruity, branching variable,
manipulating the barrier
between a vision and its shell:
between a monad and its model:
color works as well as flavor;
iron is both tongue and bell:
fruitjects split one mobius face,
sphinxing function into fact ...

peeling fructose parallax !
dizzyfruit tree ! spiral axe !
